## Product Description

Briefly describe the product. You should include the following: what the product will do, who the target users will be and how this product will benefit the sponsor.

The product is a budgeting app for setting financial goals and following up on the progress. The target users are young people from 18 until 40. This app will help the sponsor better plan financial expenses and control appetites to buy unnecessary things

## Required Features

- 1) Ability to create new categories of expenses
- 2) Set amount goals for categories
- 3) Intake from the user the category, amount, name of product and comments
- 4) Display warnings if following similar spending patterns would cause exceeding of budget goals
- 5) Display amount of spending per category per day that would keep allow to meet his goals

## Stretch Goals

- 1) Be able to have family accounts with multiple users access
- 2) Update the spread shit format of the budget
- 3) Scanning barcodes
- 4) Pulling information from store catalogs depending on barcodes of a product
- 5) Connect the app with bank apps

## Student Developer Responsibilities

1. Deliver the required features described above.
2. Maintain weekly contact with the sponsor (in person or over the phone).
3. Keep the sponsor apprised of any challenges that arise in a timely manner. If changes are required, discuss them with the sponsor and obtain approval using the Feature Change Request document.

## Sponsor Responsibilities

1. Be available for contact each week (in person or over the phone).
2. Help define use cases and desired functionality.
3. Provide honest feedback at the end of the semester.
4. Recognize that neither the students nor BYU-Idaho can be held responsible for maintaining or supporting \* this product going forward.

## Approval

By signing below, we indicate our approval of the conditions outline above.
